

## Site of Care Options

Going above and beyond filling prescriptions, Soleo Health is a complex specialty pharmacy providing a personalized patient experience and access to specialty medications and infusion therapies.

Soleo Health collaborates with healthcare providers to determine the most cost-effective and clinically suitable site for a patient's care. The decision regarding the therapy location is based on factors such as insurance coverage, the specific disease or condition, and the availability of nursing support.

### INFUSION CENTER

Best for infusions requiring close monitoring and no home preparation needed

### HOME

Ideal for patients with mobility issues or long distances from the infusion center

### PHYSICIAN OFFICE

Convenient for patients with an existing care team and treatment plan

## WHAT OUR PATIENTS SAY

“ I enjoy the sense of community and camaraderie with other patients.

“ I would rather drive to the infusion center than host a nurse at home when managing pets, privacy, children, or multiple residences.

“ Being at home reduces my stress, and I truly believe that helps my recovery.

“ It's empowering to receive advanced medical care in the comfort of my own home.

“ There are exact appointment times with schedule predictability.

“ I prefer the ability to schedule around work and family commitments outside of the home.

“ Since I do not have a car, treatment felt out of reach. Home infusion brought healthcare directly to my door.
